

# **WATER QUALITY ADVISORY**

**EFFECTIVE IMMEDIATELY,  
Friday, April 22, 2022 a  
WATER QUALITY ADVISORY  
has been issued for the  
Edgewater Water System**

The RDEK and Interior Health recommend that children, the elderly, people with weakened immune systems, and anyone seeking additional protection drink boiled water or a safe alternative until further notice. For these at-risk populations, water intended for drinking, washing fruits and vegetables, making beverages or ice, or brushing teeth should be boiled for one minute.

The RDEK has issued this water quality advisory due to high turbidity levels.

The public will be notified when conditions change or water quality has improved. Thank you for your patience.
