

CONSTRUCTION AND DEMOLITION WASTE ACCEPTANCE

Start

Is the construction and demolition waste from a new build or a renovation project being completed on a building built after 1990?

No.

Yes.

SOIL CAN BE ACCEPTED at the Regional District of East Kootenay's three subregional landfills:

- Columbia Valley Landfill
- Central Subregion Landfill
- Sparwood Landfill

Have you had a hazardous materials risk assessment completed for the construction and demolition waste?

Yes.

Was the material found to be free of hazardous material such as asbestos?

No.

No.

Yes.

Please have the material tested to confirm it is free of hazardous material.

Please follow asbestos disposal procedure if the material contains asbestos. If it contains other identified hazardous waste, the RDEK facilities are not able to accept the waste.

THIS WASTE CAN BE ACCEPTED AT ALL SUBREGIONAL LANDFILLS.

Many building materials have gotten safer as regulations have come into place. Due to this, new construction material can be brought to all three subregional landfills for direct bury. Regular tipping fees apply.

THIS WASTE CAN BE ACCEPTED AT ALL SUBREGIONAL LANDFILLS.

Note: An operator may request a copy of the hazardous waste testing report/risk assessment.
