After a series of temporary watering restriction changes over the past four weeks due to high demand, the East Side Water Service Area is returning to its regular watering hours.

In the heat of the summer, and with outdoor watering accounting for the largest water use, it is **IMPERATIVE** that residents abide by these hours and water in moderation.

These watering hours are in place for the benefit of your community and will be reduced if consumption puts a strain on the water treatment plant's capacity. *Thank you for abiding by them.*
